

357. Linden Park Place

Dear Geo Jan 19- 1909

Just a line to find out  
where you are A. E. Wills  
last letters he has reported  
you as gallivanting at  
Washington D. C. with the con-  
gressional snells there & after  
your declaration to me that  
you had no political aspirations  
I was surprised, however I hope  
you succeeded in what you went  
after. I didn't notice any falling  
off in the Pilot so guess the boy  
got along all right, we are  
all about as usual except Rose  
she has a cold & it always  
<sup>with her</sup> assumes a bronchial tendency  
& keeps her coughing incessantly  
Sime was invited out to lunch  
today & as our wash lady was  
here with Renard, we advised  
her to go, as she don't often have  
a chance

as we are both such cripples  
they don't dare leave us alone  
I am not good for much am so  
lame its very hard for me to  
get around, we are having  
a very comfortable winter  
so far. it is cold & ground cov-  
ered with snow, but that we  
must expect in a snow country  
I don't like it, would rather  
be in Fla but as I can't must  
make the best of what we have  
Lina went to Mil a few weeks  
ago to see Maria she was  
not quite as well as usual  
takes cold easy & is troubled  
with rheumatism. I must stop  
as my shoulder aches

much love from

Sue Sarah
